WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application	No.
PCT/US05/05964	

Box No. II Priority		
1.	The following document has not yet been furnished:	
	copy of the earlier application whose priority has been claimed (Rules 43bis.1 and 66.7(a)).	
	translation of the earlier application whose priority has been claimed (Rules 43bis.1 and 66.7(b)).	
	Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date is the claimed priority date.	
2.	This opinion has been established as if no priority has been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.	
This I	nal observations, if necessary: nternational Examining Authority acknowledges applicant's claim for priority to Provisional U.S. Application Serial er 60/548,847 filed 27 February 2004.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US05/05964

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement			
1. Statement			
Novelty (N)	Claims 1-167	YES	
novely (11)	Claims NONE	NO	
Inventive step (IS)	Claims <u>1-167</u>	YES	
- · ·	Claims NONE	NO	
Industrial applicability (IA)	Claims <u>1-167</u>		
	Claims NONE	NO	
Claims NONE Claims 1-167 meet the criteria set out in PCT Articles 33 (2)-(4), because the cited prior art references do not specifically teach a method to culture explanted tissue/cell in a porous material having voids/pockets providing free-field proliferation of said explant via placing the explant in a pocket of the porous material and providing to the explant a first nutrient medium with balanced air, followed by explant growth and adding a second nutrient medium according to all of the steps and components/compositions as claimed instantly. The cited prior art also does not provide a porous device having the same/similar composition and prepared according to the steps claimed instantly. Therefore, the cited prior art references only refer in general terms the subject matter of the claimed invention. Thus, the cited references do not teach or reasonably suggest a method to obtain the claimed invention. Therefore, the Claimed invention is neither anticipated nor lacks an inventive step over the cited prior art. It has, thus, an industrial applicability because the subject matter claimed can be made or used in industry.
